

Expression thru Innovation

The MH100's are a closed-back, midsized design headphone equipped with high output 40mm neodymium drivers that offer increased power and an extended frequency response of 20Hz-18kHz with exceptional detail and clarity.

Available in black (MH100) and red (MH100R), the MH100's are designed to provide hours of listening comfort with effective isolation from surrounding noise. Its excellent performance for price and solid construction make it an essential tool for superior studio performance, DJs and professional musicians.

Specifications

Frequency Response: 20Hz-18kHz

Sensitivity: 98dB
