

U7 USB Tabletop Recording Microphone

Before using the U7 in your favorite audio or communications application you must confirm that the computer's operating system recognizes the U7 microphone.

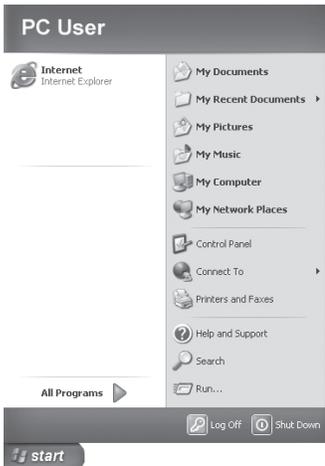

Windows XP recognition instructions

1. Plug the U7 into the USB port on the computer.

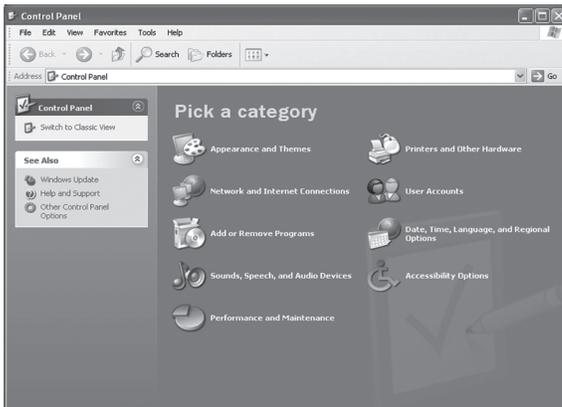

(When using a USB hub, check with the hub manufacturer to be sure the hub supports a device such as a microphone. Plug the microphone directly into the computer's powered USB port for optimal performance.)

2. Allow 30 to 60 seconds for the system software to recognize the U7. (A series of bubbles will appear by the Windows toolbar to notify you of a new device.)

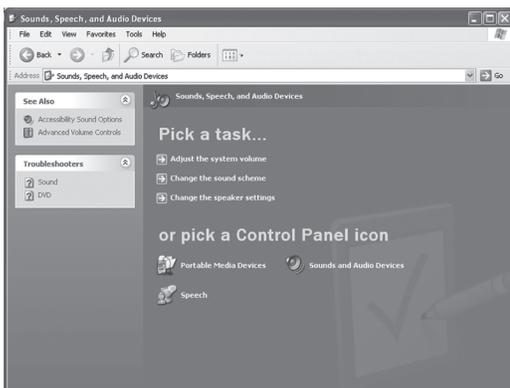

3. In the Start Menu, select Control Panel.

4. Select "Sounds, Speech, and Audio Devices".

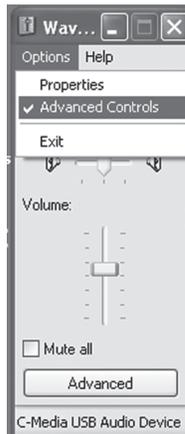

5. Select "Sounds and Audio Devices".

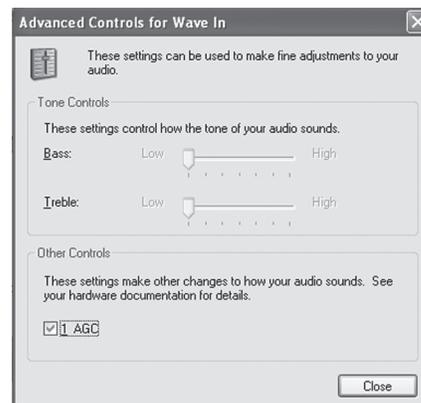

6. Select the "Audio" tab. Confirm that under the "Sound recording" section the "C-Media USB Audio Device" is selected. (The "Sound playback" should remain your usual sound output device).

7. Select the "Volume" tab under the Sound recording heading and select "Advanced Controls" in the Options menu of this window.

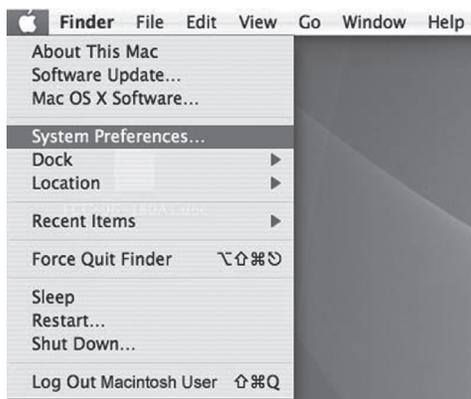

8. Click the "Advanced" button to open the "Advanced Controls for Wave In" window. Depending upon your system, you might have the option of selecting "1 AGC" or "Mic boost". Checking this option will significantly increase the sensitivity of the microphone. Use this for recording softer sounds. If you experience distortion when recording louder sounds, try unchecking this option.

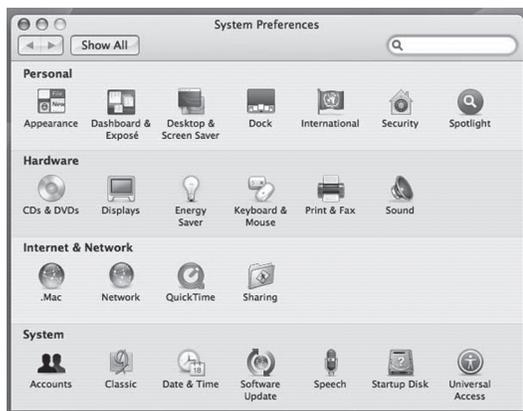

- Launch your audio recording software.
- Position the U7 approximately 4 to 6 inches from the sound source for best results.
- Locate the preferences in your audio program and select the "C-Media USB Audio Device". Adjust the input level in this program so that the audio signal is not distorted.
- Enjoy your CAD U7 USB Tabletop Recording Microphone.
- Click on the "Output" button and choose the internal speakers or the output speakers of your choice. (The "Sound playback" should remain your usual sound output device).
- Position the U7 4 to 6 inches away from your source (your mouth or music instrument).
- Test the U7 by speaking or playing into the microphone.
- You will see activity in the "Input Level" meter.

Mac OSX recognition instructions

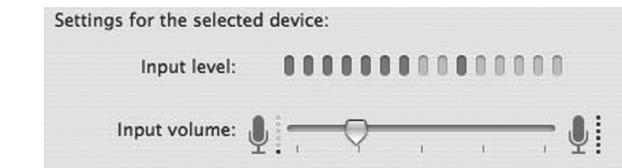

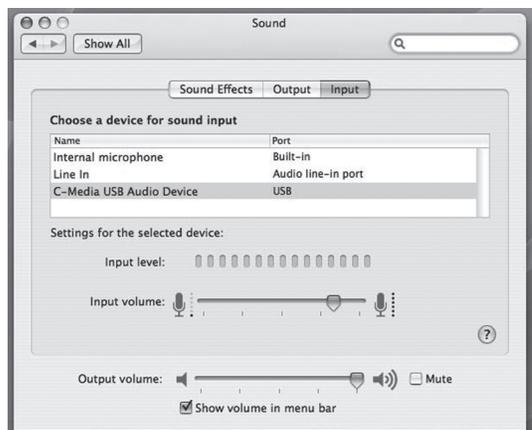

- Plug the U7 into the USB port on the computer.
(When using a USB hub, check with the hub manufacturer to be sure the hub supports a device such as a microphone. Plug the U7 directly into the computer's powered USB port for optimal performance.)
- Allow 30 to 60 seconds for the system software to recognize the U7.
- Go to the Apple Menu and locate "System Preferences".

- Under "Hardware" click on the "Sound" icon.

- Click on the "Input" button and choose the "C-Media USB Audio Device".

- As you are speaking or playing adjust the "Input Volume" slider. Take care not to allow the signal to go beyond the meter, if the meter is fully illuminated the sound can become distorted. The meter should be illuminated 3/4ths of the way to obtain the best sound quality.
- Close the System Preferences window to complete the settings.
- Launch your audio recording software.
- Position the U7 approximately 4 to 6 inches from the sound source for best results.
- Locate the Preferences in your audio program and select the "C-Media USB Audio Device". Adjust the input level in this program so that the audio signal is strong but not distorted.
- Enjoy your CAD U7 USB Tabletop Recording Microphone.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Two-Year Limited Warranty

CAD Professional Microphones hereby warrants that this product will be free of defects in material and workmanship for a period of two years from the date of purchase. In the unlikely event that a defect occurs CAD will, at its option, either repair or replace with a new unit of equal or greater value. Retain proof of purchase to validate the purchase date and return it with any warranty claim.

Return warranty claims carefully packed, insured and prepaid to the Service Department at the address listed below. This warranty excludes exterior finish or appearance, damage from abuse, misuse of the product, use contrary to CAD's instructions or unauthorized repair. All implied warranties, merchantability, or fitness for a particular purpose is hereby disclaimed and CAD hereby disclaims liability for incidental, special or consequential damages resulting from the use or unavailability of this product.

This warranty gives you specific legal rights and you may have other rights that vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above exclusions and limitations may not apply to you.

Note: No other warranty, written or oral is authorized by CAD Professional Microphones.

Please visit our service and support tab for more information regarding warranty claims.
